

April 20, 1970

Mr. C. J. Kuiper
State Engineer
232 State Services Building
Denver, Colorado 80203

Dear Mr. Kuiper:

A letter from the Colorado water users on the lower reaches of Pot Creek was received by the State Engineer on April 16, 1970. This letter apparently is asking for an adjustment of the irrigation season that would permit water to be delivered prior to May 1 to the Colorado interests. This would cut some of the storage that is now being utilized by Utah users.

Before action is taken we should perhaps discuss this problem either on my next trip to Denver or your next trip to Salt Lake City.

Very truly yours,

Hubert C. Lambert
STATE ENGINEER
